Profile

Backend engineer with about three years of professional experience, building production services in Go. Going deep on low-level systems and distributed systems: memory, concurrency, databases and networks.

Experience

Software Engineer, Mercado Livre — 2026 — present

- Backend services in Go running in production at high scale.
- TODO: what you own, the scale it runs at, and one result you can point to.
- TODO: a design decision you wrote and drove (an ADR, a migration, a reliability fix).

TODO: previous role, TODO: company — TODO

- TODO: one or two bullets.

Skills

Languages	Go, Python, C++, SQL
Systems	Distributed systems, Concurrency, Databases, Messaging and queues
Infrastructure	AWS, Containers, Observability

Languages

Portuguese	Native
English	Fluent
Spanish	Working proficiency
